**Schlage® Showcases Ground Breaking Wireless-Controlled
Home Security and Automation Innovation in CES Booth South 1 20350**

***- Partnership with Crayon Interface Delivers Home Automation
to the Front Door with Schlage LiNK -***

Las Vegas, NV, January 8, 2009 – Schlage®, the most trusted brand of door locks, is exhibiting the latest innovation that fuses home security and automation with mobile technology. The new Schlage LiNK deadbolts and locks, which will be featured in CES Booth South 1 20350, provide homeowners the power to remotely control and monitor access to their home 24/7 with any web-enabled mobile phone or computer.

Schlage LiNK's remote access capabilities were developed through a partnership with Crayon Interface, a leading provider of remote monitoring and control solutions through mobile devices and PCs. Crayon Interface's remote access platform, called Moshi®, provides networking capabilities to devices in both home and small business environments. Products "Powered by Moshi" are securely and reliably connected to the internet, allowing users to control and monitor devices including door locks, IP cameras, thermostats and lighting anytime, anywhere through intuitive graphical user interfaces on cell phones and PCs. Moshi also offers the broadest range of mobile device compatibility for remote monitoring and control solutions – with interface software compatible with every major cell phone software platform on the market today, including Java, BREW, Windows CE, BlackBerry and Apple's iPhone.

"Schlage LiNK delivers peace of mind and convenience to homeowners through the most prolific communication platform ever – the mobile phone." stated Garrick Pohl, Crayon Interface's CEO. "We are very excited to partner with Schlage, a company that has a rich heritage of more than 85 years of providing homeowners with premium door locks."

Schlage LiNK is an intelligent residential security platform utilizing wireless communication protocols and the highest levels of network security standards available. Schlage has also designed the solution to be simple to install, leveraging Crayon Interface's Network Device Manager Technology, for a true plug-and-play customer experience.

"We are excited to exhibit at CES for the first time in the brand's rich history to showcase the first and only wireless-controlled door lock that provides convenience to consumers' active lifestyles," says Dwight Gibson, general manager, Intelligent Residential Security, for Ingersoll Rand, the parent company of Schlage. "Crayon Interface has the proven expertise to create user-friendly mobile platforms and strict security standard and played a key role to help us develop a solution that is much more than just a door lock."

Schlage LiNK deadbolts and locks provide keyless entry through 4-digit access codes that can be entered, activated, deleted or disabled on the lock's 11-digit push button keypad, or via the Schlage LiNK web portal or mobile application. The solution, which will be available on Amazon.com in January, gives homeowners the freedom of never having to carry or circulate multiple sets of keys, coupled with the ability to instantaneously grant access to family members, friends, unexpected house guests, and service professionals such as cable repair technicians, pet sitters and housekeepers.

Schlage LiNK locks are the first Z-Wave-enabled locks and work seamlessly with more than 300 other Z-Wave-enabled home automation devices including products ranging from lighting and temperature to pool and spa controls.

About Schlage & Ingersoll Rand Security Technologies

Schlage® is the leader in security devices, trusted for more than 85 years, spanning both the commercial and residential markets. Commercial grade quality is built into every Schlage® product. The brand is on the forefront of developing cutting-edge technology and innovation such as wireless security products and biometrics, among others. www.schlage.com

Ingersoll Rand Security Technologies is a leading global provider of products and services that make environments safe, secure and productive. The sector's market-leading products include electronic and biometric access control systems; time and attendance and personal scheduling systems; mechanical locks and portable security, door closers and exit devices, steel doors and frames, architectural hardware and technologies and services for global security markets.

Ingersoll Rand Security Technologies is a sector of Ingersoll-Rand Company Limited, a global provider of products, services and solutions to industries as diverse as transportation, manufacturing, food retailing, construction and agriculture. www.ingersollrand.com

About Crayon Interface, Inc.

Crayon Interface is revolutionizing the way people and businesses connect to information and things! Crayon Interface develops software that enables cell phones and other mobile devices including Blackberry, iPhone and other smartphones to connect quickly and securely to equipment and information in vehicle, home and business environments. About Z-Wave

Z-Wave® is the first technology to bring affordable, reliable and easy-to-use wireless control to every aspect of daily life – the home, consumer electronics, healthcare, and energy use, to name a few. Z-Wave is an award-winning, proven and interoperable wireless mesh networking technology that allows a wide array of devices in and around the

home to communicate including lighting, appliances, HVAC, entertainment centers, and security systems. Z-Wave brings many benefits to everyday life including remote home monitoring, home healthcare, safety and security, and energy conservation. Z-Wave certified products are currently available from leading consumer brands in more than 170 products. Z-Wave is the recipient of the 2006 *Wall Street Journal* Technology Innovation Award in the wireless category, the CNET "Best of CES Award" in the enabling technologies category, along with *PC World's* 2006 World Class Award, which recognizes the 100 best technologies and products of the year. For more information about Z-Wave please visit www.z-wave.com.

About the Z-Wave Alliance

Formed in January 2005, the Z-Wave Alliance is a consortium of leading companies in the home technology space dedicated to solidifying Z-Wave as the standard for wireless home control products. The principal members include Cooper Wiring Devices, Danfoss, FAKRO, Ingersoll Rand Security Technologies, Intel, Intermatic, Leviton, Monster Cable, Wayne-Dalton, Universal Electronics Inc. (UEI) and Zensys. Its members lead the home controls market, providing leading edge products and systems that deliver increased comfort, convenience, safety and security. Z-Wave technology is the foundation of all products manufactured by the Alliance members. For more information about the Z-Wave Alliance, visit www.zwavealliance.org.

Z-Wave® is a registered trade mark of Zensys, Inc. and its subsidiaries in the United States and other countries.
